

ROHIT BHOGAL

Frontend Developer

☎ (+1) 559-426-9449 ✉ rbhogan23@gmail.com 🏠 rbhogan.github.io in rohit-bhogan 🌐 rbhogan 📍 Fresno, CA

EDUCATION

Charles W. Davidson College of Engineering, San José State University

Completed 100 Units, Bachelor of Science in Biomedical Engineering

San José, CA

Aug 2016 – Jun 2018

EXPERIENCE

Freelance Frontend Developer

Sep 1 – 21 2021

Stanza

Remote, CA

- Developed a CRUD web app/admin tool(s) to consume two RESTful APIs in order to view, add, and edit data to and from database, using React, Redux, and Material-UI
- Collaborated as the sole frontend developer in a team including a backend developer and UX designer
- Developed a secure login using bcrypt
- Connected to GraphQL backend
- Created search functionality and displayed data in spotify-esque search result cards
- Created a dashboard and displayed database data in aesthetically pleasing data tables
- Provided direction on aesthetically pleasing UI
- More info: Stanza Admin Tool 🔗

PROJECTS

GAME SAVE | React, Redux, React-Router, Heroku, Firebase, OAuth, IGDB API

Jul 2021 – Aug 2021

- Developed and designed a web app where users can search, view and upon login, bookmark information about video game titles pulled using the IGDB API
- Visualized data (game information, links, videos, screenshots, and artwork) in carousels using React Slick
- Implemented Twitch OAuth client credentials flow to retrieve access token and data from API
- Created user accounts/login and stored user data in database using Firebase Google Auth and Realtime Database
- Created slideshow feature for screenshots and artwork using Vanilla JavaScript
- Visit: Project 🔗 | GitHub 🔗

BURGERLORDS | HTML, Sass (SCSS)/ CSS Grid & Flexbox, JavaScript

Mar 2021 – Mar 2021

- Recreated a responsive, pixel-perfect copy of LA restaurant Burgerlords' landing page (8 pages) with slight improvements where I saw fit (Their original site has since changed)
- Created CSS animations using keyframes for mobile menu, header, and title cards
- Developed custom hover effect by adding and removing classes on hover using JavaScript
- Visit: Project 🔗 | GitHub 🔗

BOOKMARK | HTML, Sass (SCSS)/ CSS Grid & Flexbox, JavaScript

Feb 2021 – Mar 2021

- Developed a pixel-perfect, responsive, single page, landing page for a fictional chrome extension using provided JPEG design files and style guide
- Created an accordion, tabs, and email validation (w/regex) features using JavaScript
- Visit: Project 🔗 | GitHub 🔗
